SUMMARY

B.Tech CSE (AI & ML) student at CGC – College of Engineering who builds data-driven applications end to end, from machine-learning models in Python to full-stack products with FastAPI, React and Next.js. Co-Lead at Google Developer Groups and team member of the Infosys Springboard Club.

EDUCATION

CGC – College of Engineering

2025 – Present

B.Tech – Computer Science & Engineering (AI & ML)

Kendriya Vidyalaya Sangathan, Panchkula

2024

Class XII – Senior Secondary (CBSE)

EXPERIENCE & LEADERSHIP

Team Member · Infosys Springboard Club (COE)

2026 – Present

- Building industry-ready tech skills and taking part in club activities at the Infosys Springboard Centre of Excellence.

Co-Lead · Google Developer Groups (GDG)

2026 – Present

- Co-leading the GDG community and helping organise tech sessions, workshops and events for student developers.

PROJECTS

PulseFi AI | Next.js, TypeScript, FastAPI, XGBoost, SHAP, PostgreSQL

GitHub

- Explainable credit-scoring platform that builds a living financial identity for MSMEs: XGBoost models explained with SHAP, a FastAPI + PostgreSQL backend and a Next.js + TypeScript frontend, built for Vercel and Railway.

CRYPTORA | React, Vite, FastAPI, MySQL, Docker

GitHub

- Built with Team KRYPTX for Smart India Hackathon (PS-26164): a cryptographic-risk & post-quantum migration platform that scans code in the browser, generates a CBOM, scores quantum risk and plans PQC migration.

Reflect | JavaScript, MediaPipe, Vercel

Live demo · GitHub

- AI resume builder and skill authenticator with 16 resume templates, proctored skill tests (tab-switch, copy-paste and eye-tracking checks) and in-browser liveness detection using MediaPipe face landmarks.

Speech Emotion Recognition | Python, TensorFlow, Librosa, Streamlit

GitHub

- CNN-LSTM that recognises emotions such as happy, angry, sad and fearful from speech using MFCC, chroma and mel-spectrogram features, with a Streamlit demo to upload or record audio.

Email Spam Detection | Python, scikit-learn, pandas, Flask

GitHub

- TF-IDF features with Logistic Regression and Linear SVM reaching 98.65% accuracy (F1 0.946), served through a Flask web app and a JSON REST API.

Disease Risk Predictor | Python, scikit-learn, XGBoost, pandas, Streamlit

GitHub

- Predicts heart-disease, diabetes and breast-cancer risk; compares Logistic Regression, SVM, Random Forest and XGBoost and auto-selects the best model per dataset.

TECHNICAL SKILLS

Languages

Python, JavaScript, TypeScript, SQL, HTML, CSS

AI / ML

scikit-learn, XGBoost, TensorFlow, pandas, NumPy, SHAP, Librosa, MediaPipe, Streamlit

Web & Backend

React, Next.js, Tailwind CSS, Vite, FastAPI, Flask, REST APIs, SQLAlchemy

Databases & Tools

PostgreSQL, MySQL, Supabase, Docker, Git & GitHub, Vercel, Railway
